Detail Introduction :

Automatic Packing Machine

The main function of the **automatic packing machine** is to wrap a film on the busbar to keep away from the dust and moisture during transportation. Once the packing machine senses the materials, it will automatically start wrapping and cut the wrapping film when wrapping is finished. It can match with automatic stacking system, realize full automatic packing. It is mainly used on straight busbar, and manual packing or other packing machine is applied for elbow busbar. It is one of the accessories of the busbar machine.
