

# Wood Block Cut Saw Machine Used for Cutting the Wood Board ,plank,wood Pallet Blocks into the Right Size You Want.

## Specifications :

### Detail Introduction :

Wood block cut saw machine

Advantage of Cross cut saw machine for woodworking

Parameters of Cross Cut Saw Machine

### Wood block cut saw machine

cut saw machine for wood working is used for cutting the wood board ,plank,wood pallet blocks into the right size you want.

### Advantage of Cross cut saw machine for woodworking

- 1.High precision, cutting the long wood to blocks or pallet feet, the product completely vertical cross-section, smooth.
- 2.High capacity:cutting speed is 35-40pcs/min, an hour can cut 2400 pcs (max).
- 3.Easy to operate, Just need one worker to enter the size to be cut, then feeding the material, the machine will cutting the wood log or long wood block automatically to set size.
- 4.Cutting Size adjustable, various dimension can be combined at the same time to reduce the cutting wastage.
- 5.Security, cutting part set in the cabinet, worker's finger don't access to the blade.
6. It can cut a row of wood log or long wood block at one time.

### Parameters of Cross Cut Saw Machine

No.	Item	Specification
1	Application	Wood log,wood pallet,wood board
2	Cutting length:	Max. 2m/ 4m/ 6m
3	Cutting width	20-200mm
4	Cutting height	10-120mm
5	Cutting sectional area	120* 120mm/100* 00mm
6	Feeding speed	5-30m/min
7	Cutting speed	35-40pcs/min
8	Blade diameter	450mm
9	Cutter axle rotation speed	3500rpm

---

10	Feeding method	Servo drive
11	Pressing method	Cylinder, air pressure 0.5-0.7Mpa
12	Cutting tolerance	In +/-1mm
13	System working dimension	6.4* 1* 1.5m, 7.4* 1* 1.5m, 9.4* 1* 1.5m
14	Deducting interface	Contains
15	Total power	8.25kw
