Function of Wood Pallet Making Machine:

The block can be made into with one hole in the center or without hole. The compressed wood blocks making machines is made with high waterproof performance. They can be put into water for 48 hours without break.

Application of Wood Pallet Making Machine:

This product is mainly used to replace the wood pallets used in foot pier, free fumigation, heat treatment, free.

Processing line: Generally four pallet feet making machine are a production line, must provide the wood crusher, wood dryer, glue mixer machine, hot press wood pallet machine and dic saw. (dryer, gluing machine, grinder and so on supporting facility customer buys in addition.

Features of Wood Pallet Making Machine:

1. Free fumigation and free quarantine.
2. Insect prevention, protection against termites and do not easy to burn.
3. Meeting the E1 grade.
4. Customized sizes are available.

Parameters of Wood Pallet Making Machine

No.	Item	Specification
1	Size	75-145mm or Customizing
2	Capacity	2-9m ³ /24h

3	Glue water amount	100-120kg/m ³
4	Density	550-600kg/m ³
5	Weight	1-2Tons
6	Power	16-31kw
7	Warranty	1 year
